

Thursday July 23		
Time	Activity	Lead
1:00 pm - 2:00 pm	DL Robustness	Edgar Lobaton
2:00 pm - 2:30 pm	How is AI used in Physics? What is Physical AI?	Edgar Lobaton
2:30 pm - 3:00 pm	Presentation: From Global Weather to Local Storms: Using GNNs, PINNs, and Generative AI for Earth System Prediction	Paul Liu
	Dr. Paul Liu is Professor of College of Sciences, where he serves as Director of the AI Hub for Science and Director of International Affairs. His research integrates AI with Earth system science, focusing on applications of machine learning, graph neural networks and generative AI for weather forecasting, oceanography, and climate science. He has led numerous AI training workshops for scientists and authored the books Generative AI for Science and How to Build and Fine-Tune a Small Language Model. His current work develops AI-driven methods for global weather forecasting, local storm prediction, water quality evaluation, and trustworthy scientific AI systems.	
3:00 pm - 3:15 pm	Coffee Break	
3:15 pm - 3:45 pm	Physics 101 and Intro to PDEs	Tarek Aziz
3:45 pm - 4:15 pm	Numerical Simulations	Tarek Aziz
4:15 pm - 5:00 pm	Hands On: AI for Physics Simulation	Tarek Aziz
Friday July 24		
Time	Activity	Lead
1:00 pm - 1:30 pm	Neural ODEs	Edgar Lobaton
1:30 pm - 2:00 pm	Physics Informed Neural Nets	Edgar Lobaton
2:00 pm - 3:00 pm	Hands-On: PINNS	Tarek Aziz
3:00 pm - 3:15 pm	Coffee Break	
3:15 pm - 3:45 pm	Neural Operators	Edgar Lobaton
3:45 pm - 5:00 pm	Final Discussion and Next Steps	Edgar Lobaton
